Brochure design and photography by Al Burdett. No exotic fruits or gourmet cheeses were injured during the making of this brochure.

Bringing Color to Life™

Tea Thyme™ ceramics add a festive splash of color whether you're entertaining or enjoying a relaxing day at home. Fun, decorative, and functional—each piece is hand-painted in our Miami studio in the tradition of old world artisans.

Born in Santiago, Chile, Alexandra Guillard-Burdett has always been surrounded by a love for art and design. In the early 1990's she began exploring the art of majolica (maiolica) and found that she had a passion for painting ceramics. Fueled by demand from friends, family and local interest, what first began as a hobby eventually grew into a business and in 1997 Tea Thyme was formally established. Its mission is to create unique,

refreshing one-of-a-kind ceramics that are decorative yet functional pieces of art. Artwork that can be appreciated as part of a room's décor as well as partaking in an evening entertaining friends. Tea Thyme ceramics are created in the tradition and care inspired by old world artisans. Each piece, a hand-painted original, is made to order. We welcome you to enjoy the rest of the catalog featuring Tea Thyme's current collections. Also, be sure to visit www.tea-thyme.com for the latest introductions and news.

Handcrafted Nature

Tea Thyme™ ceramics are hand-painted originals and variations in color and design attest to the hand-crafted nature of our products. Slight imperfections such as small paint smudges or lids that are a little loose add to the character and individuality of each piece.

Care & Usage

Tea Thyme™ ceramics are functional works of art and should be handled with care.

All of Tea Thyme™ ceramics are food safe and non-toxic. Although dishwasher safe at low heat we recommend the hand washing of fine ceramics. Use in conventional ovens and microwaves is not recommended. Avoid extreme shifts in temperature. As with all hand-painted ceramic dinnerware and accessories, some crazing or discoloration of the glaze may occur over time. With proper care, your ceramics can provide years of enjoyment.
